Subject: potential extraction well locations provided by water districts
Attachments: Potential Remediation Sites.pdf; 20150323 - 170237 - OCR-SCAN.pdf

After our meeting with the water districts in December, MWD provided us with figures showing potential locations that they felt could be used to house a small shed and extraction wells. The attached figure sketches each of the locations onto a single figure. Attached is also a copy of the original pdf file provided by MWD with snapshots of each location. The location north of Hempstead Turnpike was included in the Navy's presentation last week.
